

Viskon-Aire's automatic roll filters are offered in a wide range of efficiencies, capable of being used in most commercial and industrial applications including hospitals, schools, universities, government buildings and manufacturing facilities

## Construction

- Available in both synthetic media (0.5" and 1.0" thickness) and fiberglass media (2.0" thickness); 65' standard length
- Filter media can be treated with Visikon-Aire's proprietary PBT-32™ tackifier, enhancing dust holding capacity and preventing down stream unloading
- Leaders and trailers are sewn to the filter media to assist in installation
- Extra strength laminate backing resists tearing and "necking" of the media, increasing stability

## Core Types For All Major Brands

- Air Maze Roll-A-Maze
- American Air Filter Roll-O-Mat
- BLC Industries
- Cambridge Electro-Aire
- Carrier
- Continental Conomatic and Conomanual
- Farr Roll Kleen
- Trane Roll Filter

**Please contact Visikon-Aire to assist in determining the correct core and media for your specific application**
